

Combo Packages

June 2026

MR ROKESH TECHNOLOGY

Recommended Combo Packages

Combine tracks for placement-focused career paths. All packages include *Career Development* modules integrated from Week 1.

Package Matrix

Package Name	Duration	Tracks Combined	Ideal For
Quick Start	2 Weeks	Any 1 track	Working professionals, skill sampling
Foundation	1 Month	Any 1 track + Career basics	Students, career switchers
Job Ready	3 Months	Full Stack OR Mobile OR AI/ML OR Cyber	Internship seekers
Professional	6 Months	Full Stack + Database + DevOps OR AI/ML + Data	Placement-focused graduates
Expert	9 Months	Full Stack + Cloud + DevOps + DSA OR AI/ML + Cloud + MLOps	Advanced career builders
Complete Tech	9 Months	All core tech tracks (staggered)	Comprehensive IT career

Specialized Combo Packs (Tracks 15–34)

Package Name	Duration	Tracks Combined	Ideal For
AI Professional Pack	3 / 6 / 9 Months	Prompt Eng + AI Agents + GenAI for Professionals	AI engineers, product builders
Generative AI for Business Pack	1 / 3 Months	Prompt Eng for Business + GenAI for Professionals	Managers, non-technical professionals
Data & BI Pack	3 / 6 Months	Data Analytics + Power BI + Tableau	Analysts, BI developers
DevOps Engineer Pack	3 / 6 / 9 Months	DevOps Engineering + Cloud DevOps + Cloud Platforms	DevOps/SRE candidates
Industrial Automation Pack	3 / 6 Months	PLC + Embedded Systems + Robotics & IoT	Manufacturing, instrumentation engineers
Hardware & Robotics Pack	3 / 6 / 9 Months	Arduino + Raspberry Pi + ROS2 + Robotics & IoT	Robotics engineers, makers
Drone & Autonomous Systems Pack	3 / 6 Months	Drone Programming + ROS2 + Computer Vision	UAV/autonomous systems roles
Embedded & IoT Pack	3 / 6 Months	Embedded Systems + Arduino + Raspberry Pi	Firmware/IoT developers
Computer Vision Engineer Pack	3 / 6 Months	Computer Vision + AI/ML + Python (Track 3)	CV/ML engineers
Blockchain Developer Pack	3 / 6 Months	Blockchain + Full Stack + Programming Languages	Web3 developers
QA & Test Automation Pack	3 / 6 Months	QA Automation + Full Stack (testing focus)	SDET, QA engineers
Enterprise Business Pack	3 / 6 Months	Salesforce + SAP Basics + Data Analytics	ERP/CRM consultants
Smart Manufacturing Pack	6 / 9 Months	PLC + ROS2 + DevOps + IoT	Industry 4.0 engineers
Fashion Designer & Brand Pack	3 / 6 Months	Fashion Technology + Digital Marketing + UI/UX	Fashion designers, brand founders

Package Details

Quick Start (2 Weeks)

- **Includes:** One track crash course + intro career module
- **Outcome:** Skill awareness; sample project for portfolio
- **Ideal for:** Professionals exploring a new domain before committing

Foundation (1 Month)

- **Includes:** One track foundation + resume/LinkedIn basics
- **Outcome:** 2 guided projects; GitHub portfolio started
- **Ideal for:** School/college students and career switchers

Job Ready (3 Months)

- **Pick one primary track:**
 - [Full Stack Development](#)
 - [Mobile App Development](#)
 - [AI, ML & Data Science](#)
 - [Cybersecurity & Ethical Hacking](#)
- **Outcome:** Internship-ready with capstone project
- **Ideal for:** Final-year students seeking internships

Professional (6 Months)

Option A — Full Stack Path | Month | Primary Track | Supporting Track | |——|———|
 ————| | M1–M4 | Full Stack (M1–M4) | — | | M5 | Full Stack (M5) | Database Technologies (M2 topics) | | M6 | Full Stack Capstone | DevOps basics (Docker, CI/CD) |

Option B — Data & AI Path | Month | Primary Track | Supporting Track | |——|———|
 ————| | M1–M4 | AI/ML & Data Science (M1–M4) | Database (SQL analytics) | | M5–M6 | AI/ML Capstone | Cloud deployment basics |

- **Outcome:** Job-ready with production capstone
- **Ideal for:** Graduates targeting placement drives

Expert (9 Months)

Option A — Full Stack + Cloud + DevOps | Phase | Months | Tracks | |——|——|——| | Foundation | M1–M3 | Full Stack (3-month tier) | | Backend depth | M4–M5 | Database + Programming Languages (DSA) | | Cloud & DevOps | M6–M7 | Cloud Platforms + DevOps | | Capstones | M8–M9 | 2 advanced capstones + certification prep |

Option B — AI/ML + Cloud + MLOps | Phase | Months | Tracks | |——|——|——| | Data foundation | M1–M3 | AI/ML (3-month tier) | | Deep learning | M4–M5 | AI/ML (M4–M5) | | MLOps & Cloud | M6–M7 | Cloud Platforms + DevOps | | Capstones | M8–M9 | Production ML pipeline + AI product |

- **Outcome:** Industry-ready with certifications
- **Ideal for:** Serious career builders targeting mid-level roles

Complete Tech (9 Months — Staggered)

Month	Focus Track	Hours/Week
M1	Full Stack (frontend)	20
M2	Full Stack (backend)	20
M3	Database Technologies	15
M4	Programming Languages (DSA)	15
M5	Cloud & DevOps	15
M6	AI/ML intro	15
M7	Cybersecurity basics OR Mobile	15
M8	UI/UX OR Digital Marketing (elective)	10
M9	Capstone + placement sprint	25

- **Outcome:** Broad IT competency across domains
- **Ideal for:** Students wanting maximum exposure before specialization

Specialized Combo Pack Details

All specialized packs include [Career Development \(Track 14\)](#) from Week 1. Durations shown as **available tiers** — institution assigns 3-month, 6-month, or 9-month based on student availability.

AI Professional Pack

Tracks: [Prompt Engineering \(17\)](#) + [AI Agent Development \(18\)](#) + [Generative AI for Professionals \(34\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 17 (3-month tier) → M2: Track 18 (M1–M2) → M3: Integrated capstone	RAG app + single agent deployed
6 Months	M1–M2: Track 17 → M3–M4: Track 18 → M5–M6: Track 34 + production capstone	Production LLM product + agent system
9 Months	Full 6-month path + M7–M9: Advanced capstones (multi-agent SaaS + eval framework)	Industry-ready AI engineer portfolio

Ideal for: Developers building LLM products, AI startups, technical product managers.

Optional add-on: [Track 5 — AI/ML](#) for ML fundamentals (extend to 9 months).

Generative AI for Business Pack

Tracks: [Prompt Engineering for Business \(33\)](#) + [Generative AI for Professionals \(34\)](#)

Duration	Schedule	Outcome
1 Month	W1–W2: Track 33 → W3–W4: Track 34	Business prompt library + multi-modal portfolio
3 Months	M1: Track 33 → M2: Track 34 → M3: Business innovation capstone	Department AI playbook + ROI case study

Ideal for: Managers, HR, marketing, sales, educators — **no coding required.**

Optional add-on: [Track 11 — Digital Marketing](#) for AI-powered marketing workflows.

Data & BI Pack

Tracks: [Data Analytics \(16\)](#) + [Power BI \(29\)](#) + [Tableau \(30\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 16 (SQL, Python, EDA) → M2: Track 29 → M3: Track 30 + capstone	Cross-platform BI dashboard portfolio
6 Months	M1–M3: As above → M4–M5: Advanced DAX + LOD → M6: PL-300 / Tableau cert prep	Certification-ready BI analyst

Ideal for: Data analysts, business intelligence developers, reporting specialists.

Capstone: Executive dashboard published in both Power BI Service and Tableau Public with written case study.

DevOps Engineer Pack

Tracks: [DevOps Engineering \(15\)](#) + [Cloud & DevOps \(7\)](#) + [Cloud Platforms \(8\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 7 (3-month tier) → M2: Track 15 (M1–M2) → M3: Track 8 intro + capstone	CI/CD + K8s + AWS deploy
6 Months	M1–M2: Track 7 → M3–M4: Track 15 → M5–M6: Track 8 + observable system capstone	Job-ready DevOps engineer
9 Months	Full 6-month + M7–M9: GitOps, multi-cloud, CKA/SAA prep	SRE/platform engineer track

Ideal for: DevOps engineers, SREs, cloud infrastructure roles.

Industrial Automation Pack

Tracks: [PLC & Industrial Automation \(25\)](#) + [Embedded Systems \(20\)](#) + [Robotics & IoT \(19\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 25 (ladder logic, HMI) → M2: Track 20 (firmware basics) → M3: Track 19 (IoT integration) + capstone	PLC + IoT connected factory sim
6 Months	M1–M3: As above → M4: SCADA + Industry 4.0 → M5–M6: Smart factory capstone	Automation engineer portfolio

Ideal for: EEE/ECE graduates, instrumentation technicians, manufacturing engineers.

Hardware note: Factory I/O simulator for PLC; Arduino/sensor kit for IoT labs.

Hardware & Robotics Pack

Tracks: [Arduino \(22\)](#) → [Raspberry Pi \(21\)](#) → [ROS2 \(23\)](#) → [Robotics & IoT \(19\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 22 → M2: Track 21 → M3: Track 23 intro + capstone	Sensor robot with sim navigation
6 Months	M1: Track 22 → M2: Track 21 → M3–M4: Track 23 → M5–M6: Track 19 + autonomous robot capstone	Robotics developer portfolio
9 Months	Full 6-month + M7–M9: Track 24 (Drone) OR advanced ROS2 multi-robot capstone	Autonomous systems engineer

Ideal for: Robotics enthusiasts, ME/ECE students, maker community graduates.

Progression path: Arduino (beginner) → Pi (edge computing) → ROS2 (robot software) → integrated capstone.

Drone & Autonomous Systems Pack

Tracks: [Drone Programming \(24\)](#) + [ROS2 \(23\)](#) + [Computer Vision \(26\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 23 (ROS2 basics) → M2: Track 24 (PX4, missions) → M3: Track 26 intro + vision-guided sim capstone	Autonomous drone in simulation
6 Months	M1–M2: ROS2 + Drone deep dive → M3–M4: Track 26 → M5–M6: Vision-guided UAV capstone	UAV software engineer portfolio

Ideal for: Aerospace, defense, surveying, delivery drone startups.

Safety: Simulation-only until 6-month tier with certified outdoor authorization.

Embedded & IoT Pack

Tracks: [Embedded Systems \(20\)](#) + [Arduino \(22\)](#) + [Raspberry Pi \(21\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 22 → M2: Track 20 (STM32, RTOS intro) → M3: Track 21 + IoT capstone	Edge device with cloud dashboard
6 Months	M1–M3: As above → M4–M6: FreeRTOS, OTA, edge AI on Pi capstone	Firmware + IoT engineer ready

Ideal for: Embedded firmware developers, IoT product engineers.

Computer Vision Engineer Pack

Tracks: [Computer Vision \(26\)](#) + [AI/ML & Data Science \(5\)](#) + [Programming Languages \(3\)](#) (Python focus)

Duration	Schedule	Outcome
3 Months	M1: Track 3 (Python, 1-month) → M2: Track 5 (ML basics) → M3: Track 26 + detector capstone	Custom YOLO model deployed
6 Months	M1–M2: Python + ML (3-month tiers) → M3–M5: Track 26 → M6: Industrial CV capstone	CV engineer job-ready

Ideal for: AI engineers, quality inspection, surveillance, robotics perception roles.

Blockchain Developer Pack

Tracks: [Blockchain \(27\)](#) + [Full Stack Development \(1\)](#) + [Programming Languages \(3\)](#) (JavaScript/Python)

Duration	Schedule	Outcome
3 Months	M1: Track 3 (1-month Python/JS) → M2: Track 1 (backend/API focus) → M3: Track 27 + dApp capstone	Testnet dApp with frontend
6 Months	M1–M2: Full Stack (3-month tier) → M3–M4: Track 27 → M5–M6: Security audit + DeFi capstone	Web3 developer portfolio

Ideal for: Web3 developers, smart contract engineers, dApp builders.

QA & Test Automation Pack

Tracks: [QA Automation \(28\)](#) + [Full Stack Development \(1\)](#) (understand apps under test)

Duration	Schedule	Outcome
3 Months	M1: Track 1 (1-month frontend/backend basics) → M2– M3: Track 28 + framework capstone	UI + API automation framework
6 Months	M1–M2: Track 1 (3-month tier, reduced scope) → M3–M5: Track 28 (BDD, performance) → M6: CI-integrated SDET capstone	SDET job-ready

Ideal for: QA engineers transitioning to SDET, test automation specialists.

Optional add-on: [Track 15 — DevOps Engineering](#) for CI/CD pipeline ownership (extend to 9 months).

Enterprise Business Pack

Tracks: [Salesforce \(31\)](#) + [SAP Basics \(32\)](#) + [Data Analytics \(16\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 32 (SAP MM/SD/FI) → M2: Track 31 (Admin + Flow) → M3: Track 16 + reporting capstone	CRM + ERP analytics dashboard
6 Months	M1–M3: As above → M4–M5: Salesforce Admin cert + SAP specialization → M6: Enterprise integration capstone	ERP/CRM consultant ready

Ideal for: Business graduates, ERP/CRM consultants, enterprise IT roles.

Certification targets: Salesforce Administrator (M5–M6); SAP TS4C01 awareness.

Smart Manufacturing Pack (Industry 4.0)

Tracks: [PLC & Industrial Automation \(25\)](#) + [ROS2 \(23\)](#) + [DevOps Engineering \(15\)](#) + [Robotics & IoT \(19\)](#)

Duration	Schedule	Outcome
6 Months	M1: Track 25 → M2: Track 19 → M3: Track 23 → M4: Track 15 (IoT pipelines) → M5–M6: Smart factory capstone	Industry 4.0 engineer
9 Months	Full 6-month + M7–M9: Track 24 (drone inspection) OR Track 26 (CV quality control) + enterprise capstone	Advanced smart manufacturing portfolio

Ideal for: Manufacturing automation, smart factory, industrial IoT roles.

Fashion Designer & Brand Pack

Tracks: [Fashion Technology \(53\)](#) + [Digital Marketing \(11\)](#) + [UI/UX & Web Design \(09\)](#)

Duration	Schedule	Outcome
3 Months	M1: Track 53 (3-month tier) → M2: Track 11 (brand social + ads) → M3: Mini collection + campaign capstone	Fashion brand launch portfolio
6 Months	M1–M3: Track 53 (6-month tier) → M4: Track 09 (brand website) → M5–M6: Marketing + Career (14)	Designer portfolio + lookbook + e-commerce landing page

Ideal for: Fashion design students, textile graduates, apparel entrepreneurs, merchandisers.

Specialized Pack Selection Guide

If the student wants to...	Start with this pack
Build ChatGPT-style products	AI Professional Pack
Use AI at work without coding	Generative AI for Business Pack
Become a data analyst / BI developer	Data & BI Pack
Work in cloud infrastructure	DevOps Engineer Pack
Enter manufacturing / PLC roles	Industrial Automation Pack
Build robots or drones	Hardware & Robotics Pack OR Drone Pack
Write firmware for devices	Embedded & IoT Pack
Detect objects with cameras	Computer Vision Engineer Pack
Build Web3 / crypto apps	Blockchain Developer Pack
Become an SDET / test engineer	QA & Test Automation Pack
Work with SAP or Salesforce	Enterprise Business Pack
Lead smart factory projects	Smart Manufacturing Pack
Launch a fashion brand or design career	Fashion Designer & Brand Pack

Add-On Support Services

Can be bundled with any package:

Service	Duration Options	Link
School & College Projects	2 weeks – 9 months	Track 12
Project Report / Thesis Writing	2 weeks – 9 months	Track 13
Career Development & Soft Skills	Integrated (all tracks)	Track 14

Ideal Student Profiles

Profile	Recommended Package	Notes
Working professional (limited time)	Quick Start → Foundation	Start with 2-week crash, upgrade if interested
Final-year B.Tech/BCA student	Job Ready or Professional	Align capstone with college project

Profile	Recommended Package	Notes
Career switcher (non-IT background)	Foundation → Job Ready	Allow extra time for programming basics
Placement-focused graduate	Professional or Expert	Include weekly mock interviews from M4
Entrepreneur / freelancer	Quick Start + Digital Marketing	Combine tech + marketing tracks
AI product developer	AI Professional Pack (6–9 months)	Tracks 17 + 18 + 34
Non-technical manager adopting AI	Generative AI for Business Pack	Tracks 33 + 34; no coding
Manufacturing / EEE graduate	Industrial Automation or Smart Manufacturing Pack	Tracks 25 + 19 + 20
BI / reporting specialist	Data & BI Pack	Tracks 16 + 29 + 30
ERP/CRM consultant	Enterprise Business Pack	Tracks 31 + 32 + 16
Robotics hobbyist → engineer	Hardware & Robotics Pack	Arduino → Pi → ROS2 progression
Civil Engineering student	Civil Design Professional	Tracks 35 + 36 + 16
ECE / VLSI student	ECE VLSI & Embedded (6 mo)	Tracks 40 + 20 + 22
Cyber Security (blue team)	Cyber Defense Professional	Tracks 06 + 41 + 44
AI & ML department student	AI & ML Deep Learning Pack	Tracks 05 + 43 + 18
Mechanical / Mechatronics student	Mechatronics Integrated	Tracks 37 + 42 + 23
EEE / Power systems student	EEE Industrial Pack	Tracks 39 + 25 + 38
Fashion Technology student	Fashion Designer & Brand	Tracks 53 + 11 + 09

Department Combo Packages

Package	Department	Tracks	Duration
CSE Professional	CSE, IT	01 + 02 + 15 + 28	6 months
AI & DS Complete	AI&DS, AI&ML	05 + 16 + 17 + 43	6 months
IT Enterprise	IT	31 + 32 + 41 + 08	6 months
ECE Embedded & IoT	ECE	20 + 22 + 21 + 19	6 months
Cyber Defense Professional	Cyber, IT	06 + 41 + 44	6 months
EEE Industrial	EEE	39 + 25 + 38 + 20	6 months
Mechanical Design & Robotics	Mech, Mechatronics	37 + 38 + 23 + 42	6 months
Civil Design Professional	Civil	35 + 36 + 16	3–6 months
Mechatronics Integrated	Mechatronics	42 + 25 + 23 + 19	6–9 months
Fashion Designer & Brand	Fashion Technology	53 + 11 + 09	3–6 months
