

Track 16: Data Analytics

June 2026

Track 16: Data Analytics

MR ROKESH TECHNOLOGY — Training & Internship Programs

Skill path: Excel → SQL → Python/Pandas → Statistics → Visualization → Dashboards → Business Intelligence

Related: [Track 5 — AI/ML](#) | [Track 29 — Power BI](#) | [Track 30 — Tableau](#)

Track Overview

Who this is for: Aspiring data analysts, business analysts, and professionals needing data-driven decision skills.

Prerequisites: Basic computer literacy; no coding required for 2-week/1-month tiers.

Tools: Excel, Google Sheets, SQL (PostgreSQL/MySQL), Python, Pandas, Jupyter, Matplotlib/Seaborn, Power BI or Tableau (intro).

Certification targets: Google Data Analytics Certificate alignment (optional, 6-month)

Outcomes by Duration

Duration	Hours	Job Readiness	Key Deliverables
2 Weeks	40–50	Analytics awareness	Sales dashboard + SQL report
1 Month	80–100	Junior analyst basics	End-to-end analytics case study
3 Months	250–300	Internship-ready	Multi-dataset BI dashboard capstone
6 Months	500–600	Job-ready analyst	Portfolio of 5+ analytics projects
9 Months	750–900	Senior analyst track	Advanced analytics + stakeholder presentations

2-Week Crash Course

Mini Project: Sales analytics dashboard | **Level:** L1

Days	Topics	Deliverable
D1–2	Excel: formulas, pivot tables, charts	Sales summary dashboard
D3–4	SQL: SELECT, JOIN, GROUP BY, aggregations	10 analytical queries
D5–6	Python + Pandas: data cleaning, EDA	Cleaned dataset + insights report
D7–8	Visualization: Matplotlib/Seaborn or BI tool	Interactive charts
D9–10	Storytelling with data, capstone	Executive analytics report

1-Month Foundation

Week	Topics	Project
W1	Excel advanced, Power Query intro	Financial tracker dashboard
W2	SQL deep dive, window functions	HR analytics queries
W3	Python/Pandas, statistics basics	EDA on retail dataset
W4	Dashboard build, presentation	Business analytics case study

3-Month Job Ready

Month	Topics	Projects
M1	Excel, SQL, data modeling basics	Inventory + sales analytics
M2	Python, Pandas, statistics, A/B testing intro	Customer churn analysis
M3	BI tools, dashboards, capstone	Multi-source analytics dashboard

Capstone: Connect SQL + CSV sources; 5+ KPIs; executive summary; recommendations section.

6-Month Professional

Month	Topics	Projects
M1–M2	Advanced SQL, Python, statistics	2 domain reports (HR, retail)
M3	Cohort analysis, funnel analysis, forecasting intro	Marketing funnel report
M4	Power BI or Tableau mastery	Interactive BI dashboard
M5	Data governance, documentation, stakeholder communication	Client-style presentation
M6	Capstone + portfolio	Industry analytics portfolio (5 projects)

9-Month Advanced

Capstones: Predictive analytics dashboard + cross-functional business intelligence platform | **Level:** L5

Additional: Advanced statistics, time series, dbt intro, data warehouse concepts, executive presentation coaching.

Assessment Rubric

Component	Weight	Criteria
Weekly Quiz	20%	SQL, Excel, stats, visualization concepts
Lab Completion	40%	Queries run; dashboards functional
Project	30%	Insight quality, accuracy, storytelling
Portfolio	10%	Case studies with before/after metrics

Appendix: Mentor Notes

Distinction from Track 5: Focus on business analytics and BI, not ML model building. Pair with [Track 29](#) or [Track 30](#) for tool depth.
