

Track 28: QA Automation

June 2026

Track 28: QA Automation

MR ROKESH TECHNOLOGY — Training & Internship Programs

Skill path: Manual Testing → Test Design → Selenium → API Testing → CI/CD → Performance → Framework Design

Related: [Track 1 — Full Stack](#) | [Track 15 — DevOps Engineering](#)

Track Overview

Who this is for: Aspiring QA engineers, SDETs, and developers adding test automation skills.

Prerequisites: Basic understanding of web applications; programming (Java/Python/JavaScript) for automation tiers.

Tools: Selenium WebDriver, Playwright, Cypress, Postman/Newman, JUnit/TestNG/Pytest, Jenkins/GitHub Actions, JMeter/k6.

Certification targets: ISTQB Foundation (optional, 6-month)

Outcomes by Duration

Duration	Hours	Job Readiness	Key Deliverables
2 Weeks	40–50	QA awareness	Test plan + automated smoke tests
1 Month	80–100	Junior QA automation	Selenium test suite
3 Months	250–300	SDET internship-ready	UI + API automation framework
6 Months	500–600	SDET job-ready	CI-integrated test framework
9 Months	750–900	Senior SDET track	Enterprise test platform

2-Week Crash Course

Days	Topics	Deliverable
D1–2	SDLC, test levels, test case design	20 test cases for sample app
D3–4	Selenium WebDriver basics (Java/Python)	5 automated UI tests
D5–6	XPath/CSS selectors, waits, Page Object Model	POM-based test class
D7–8	API testing with Postman	10 API test cases + collection
D9–10	Test reporting, capstone	Smoke test suite + test report

1-Month Foundation

Week	Topics	Project
W1	Manual testing, bug reporting, JIRA	Bug reports for demo app
W2	Selenium/Playwright, POM pattern	UI automation suite (15 tests)
W3	API testing, Postman, Newman CLI	API regression collection
W4	Data-driven testing, reporting (Allure)	Automated regression pack

3-Month Job Ready

Month	Topics	Projects
M1	Advanced Selenium/Playwright, cross-browser	E-commerce UI automation
M2	REST API automation (RestAssured/requests)	API + UI integrated tests
M3	Framework design, CI integration, capstone	Custom test automation framework

Capstone: Page Object Model framework; config-driven; HTML/Allure reports; runs in CI.

6-Month Professional

Month	Topics	Projects
M1–M3	As 3-month track	—
M4	Performance testing (JMeter/k6)	Load test report
M5	Mobile testing (Appium intro), BDD (Cucumber)	BDD test suite
M6	Capstone	Full-stack QA automation platform

9-Month Advanced

Capstones: Multi-project test orchestration platform + performance + security test pipeline | **Level:** L5

Assessment Rubric

Component	Weight	Criteria
Weekly Quiz	20%	Testing concepts, tools, patterns
Lab Completion	40%	Tests pass; coverage adequate
Project	30%	Framework quality, maintainability
Portfolio	10%	GitHub repos, test reports

Appendix: Mentor Notes

Use open-source demo apps (Sauce Demo, ParaBank) for consistent labs. Pair with [Track 1](#) so students understand the apps they test.
