

Track 50: Cloud Computing

June 2026

Track 50: Cloud Computing

Tier 1 — Highest Demand | Departments: CSE · IT · AI&DS · AI&ML

Skill path: Cloud Concepts → AWS/Azure/GCP → Compute → Storage → Networking → Serverless → DevOps Deploy → Multi-Cloud

Related: [Track 07 — DevOps](#) · [Track 08 — Cloud Platforms](#) · [Track 15 — DevOps Engineering](#)

Track Overview

Who this is for: CSE and IT students targeting cloud engineer, cloud administrator, and solutions architect roles. Consolidated “Cloud Computing” program for Tier 1 marketing.

Prerequisites: Basic Linux and networking helpful; taught from fundamentals.

Tools: AWS, Azure, GCP free tiers, CLI tools, Docker, Terraform intro, CloudWatch/Monitor.

Certification targets: AWS Cloud Practitioner / SAA (6-month), AZ-900 (optional)

Outcomes by Duration

Duration	Hours	Job Readiness	Key Deliverables
2 Weeks	40–50	Cloud awareness	3-tier architecture on AWS
1 Month	80–100	Junior cloud basics	Multi-service cloud project
3 Months	250–300	Cloud engineer intern	Serverless + container capstone
6 Months	500–600	Job-ready cloud engineer	Multi-cloud portfolio + cert prep

2-Week Crash Course

Days	Topics	Deliverable
D1–2	Cloud models, IAM, EC2/VMs	Running cloud instance
D3–4	S3/Blob storage, CDN, static sites	Hosted static website
D5–6	RDS/SQL, VPC/networking basics	2-tier database app
D7–8	Lambda/Functions, API Gateway	Serverless API
D9–10	Cost optimization, capstone	3-tier cloud architecture live

1-Month Foundation

Week	Topics	Project
W1	AWS core: IAM, EC2, S3, VPC	Secure VPC setup
W2	Azure OR GCP parallel lab	Second platform deployment
W3	Containers on cloud (ECS/Cloud Run)	Containerized app deploy
W4	Monitoring, billing alerts, capstone	Full cloud project

3-Month Job Ready

Month	Topics	Projects
M1	AWS/Azure deep dive	HA web application
M2	Serverless, DynamoDB, messaging (SQS/SNS)	Event-driven pipeline
M3	Terraform IaC intro, CI/CD to cloud, capstone	Production cloud capstone

6-Month Professional

M1–M3 + multi-cloud DR design + Kubernetes on cloud (EKS/GKE) + certification prep + cost optimization audit.

Assessment Rubric

Weekly Quiz 20% | Lab completion 40% | Project 30% | Portfolio 10%

Appendix: Mentor Notes

Marketing name “**Cloud Computing**” maps to technical depth in Tracks 07 + 08 + 15. Use this track for Tier 1 brochures; reference sibling tracks for advanced DevOps depth.
