

Track 30: Tableau

June 2026

Track 30: Tableau

MR ROKESH TECHNOLOGY — Training & Internship Programs

Skill path: Connect → Transform → Visualize → Calculated Fields → Dashboards → Stories → Server/Public

Related: [Track 16 — Data Analytics](#) | [Track 29 — Power BI](#)

Track Overview

Who this is for: Data analysts and BI professionals preferring Tableau for visualization and storytelling.

Prerequisites: Basic Excel; SQL helpful for 1-month+ tiers.

Tools: Tableau Desktop/Public, Tableau Prep, calculated fields, parameters, dashboards.

Certification targets: Tableau Desktop Specialist / Certified Data Analyst (6-month)

Outcomes by Duration

Duration	Hours	Job Readiness	Key Deliverables
2 Weeks	40–50	Tableau awareness	Interactive dashboard
1 Month	80–100	Junior Tableau analyst	Multi-sheet workbook
3 Months	250–300	Internship-ready	Story-driven analytics capstone
6 Months	500–600	Certified analyst ready	Portfolio of 5+ workbooks
9 Months	750–900	Senior visualization expert	Enterprise dashboard suite

2-Week Crash Course

Days	Topics	Deliverable
D1–2	Tableau interface, connecting data, dimensions/measures	First visualization workbook
D3–4	Charts: bar, line, scatter, maps, dual-axis	8 chart types demo
D5–6	Filters, parameters, calculated fields	Interactive parameter dashboard
D7–8	Dashboards, actions, tooltips	Linked dashboard
D9–10	Tableau Public publish, capstone	Published analytics dashboard

1-Month Foundation

Week	Topics	Project
W1	Data connections, joins, blends	Multi-source workbook
W2	Calculated fields, LOD expressions intro	Advanced metrics dashboard
W3	Dashboard design best practices	Executive sales dashboard
W4	Stories, animations, publishing	Data story presentation

3-Month Job Ready

Month	Topics	Projects
M1	Tableau Prep, data cleaning pipelines	Cleaned dataset pipeline
M2	LOD expressions, advanced calculations	Cohort analysis dashboard
M3	Server/Cloud publishing, capstone	Industry analytics capstone

6-Month Professional

Month	Topics	Projects
M1–M3	As 3-month track	—
M4	Performance optimization, extract management	Optimized workbook guide
M5	Tableau Server admin basics, governance	Published project with permissions
M6	Certification prep + capstone	Certification-ready portfolio

9-Month Advanced

Capstones: Real-time dashboard integration + enterprise visualization standards guide | **Level:** L5

Assessment Rubric

Component	Weight	Criteria
Weekly Quiz	20%	Tableau concepts, LOD, design
Lab Completion	40%	Workbooks functional and accurate
Project	30%	Visual design, insight quality
Portfolio	10%	Tableau Public profile, workbooks

Appendix: Mentor Notes

Tableau Public free for learning. Pair with [Track 16](#) for analytical depth beyond visualization.
