

Track 29: Power BI

June 2026

Track 29: Power BI

MR ROKESH TECHNOLOGY — Training & Internship Programs

Skill path: Data Import → Power Query → DAX → Data Modeling → Visualizations → Dashboards → Publishing

Related: [Track 16 — Data Analytics](#) | [Track 30 — Tableau](#)

Track Overview

Who this is for: Data analysts, business professionals, and BI developers in Microsoft-centric organizations.

Prerequisites: Basic Excel; SQL helpful for 1-month+ tiers.

Tools: Power BI Desktop, Power Query, DAX, Power BI Service, Excel integration.

Certification targets: PL-300 Microsoft Power BI Data Analyst (6-month)

Outcomes by Duration

Duration	Hours	Job Readiness	Key Deliverables
2 Weeks	40–50	Power BI awareness	Interactive sales dashboard
1 Month	80–100	Junior BI analyst	Multi-page report
3 Months	250–300	Internship-ready	Enterprise-style dashboard
6 Months	500–600	PL-300 ready	Portfolio of 5+ reports
9 Months	750–900	Senior BI developer	Embedded analytics solution

2-Week Crash Course

Days	Topics	Deliverable
D1–2	Power BI interface, data import, relationships	Connected data model
D3–4	Power Query: transform, merge, append	Cleaned dataset
D5–6	Visualizations: charts, maps, KPIs, slicers	5-page report draft
D7–8	DAX basics: CALCULATE, SUM, COUNT, filters	10 DAX measures
D9–10	Publishing, sharing, capstone	Published sales dashboard

1-Month Foundation

Week	Topics	Project
W1	Data modeling, star schema, relationships	Normalized data model
W2	Power Query advanced, parameters	Dynamic data refresh report
W3	DAX: time intelligence, CALCULATE, ALL	YoY/MoM analysis report
W4	Dashboard design, drill-through, bookmarks	Executive KPI dashboard

3-Month Job Ready

Month	Topics	Projects
M1	Advanced modeling, role-playing dimensions	Finance analytics model
M2	Complex DAX, row-level security	Multi-department dashboard
M3	Power BI Service, gateways, capstone	Enterprise BI dashboard capstone

6-Month Professional

Month	Topics	Projects
M1–M3	As 3-month track	—
M4	Paginated reports, Power BI embedded	Embedded report demo
M5	Performance optimization, best practices	Optimized model documentation
M6	PL-300 prep + capstone	Certification-ready portfolio

9-Month Advanced

Capstones: Real-time analytics dashboard + embedded Power BI SaaS integration | **Level:** L5

Assessment Rubric

Component	Weight	Criteria
Weekly Quiz	20%	DAX, modeling, Power Query
Lab Completion	40%	Reports render; measures correct
Project	30%	Design, accuracy, usability
Portfolio	10%	.pbix files, published links

Appendix: Mentor Notes

Provide sample datasets (AdventureWorks, financial samples). Cross-track with [Track 16](#) for SQL/Python depth.
