

Track 44: SOC Analyst & Digital Forensics

June 2026

Track 44: SOC Analyst & Digital Forensics

Departments: Cyber Security · IT | MR ROKESH TECHNOLOGY

Skill path: SOC Operations → SIEM → Log Analysis → Incident Response → Digital Forensics → Malware Analysis → Reporting

Related: [Track 06 — Cybersecurity & Ethical Hacking](#) | [Track 41 — Network Admin](#)

Track Overview

Who this is for: Cyber Security department students targeting blue team, SOC analyst, and digital forensics roles.

Prerequisites: [Track 6](#) 1-month foundation OR [Track 41](#) networking basics.

Tools: Splunk/Wazuh/Elastic SIEM, Wireshark, Autopsy, FTK intro, VirusTotal, MITRE ATT&CK, isolated forensic VMs.

Outcomes by Duration

Duration	Hours	Job Readiness	Key Deliverables
2 Weeks	40–50	SOC awareness	SIEM alert triage report
1 Month	80–100	Junior SOC analyst	Incident response playbook
3 Months	250–300	Internship-ready	Full IR + forensics capstone
6 Months	500–600	SOC analyst job-ready	Blue team portfolio
9 Months	750–900	Senior analyst track	Enterprise IR simulation

2-Week Crash Course

Days	Topics	Deliverable
D1–2	SOC roles, kill chain, MITRE ATT&CK	ATT&CK mapping exercise
D3–4	SIEM: log ingestion, dashboards, alerts	5 alert triage reports
D5–6	Network forensics, PCAP analysis	Wireshark investigation report
D7–8	Disk forensics intro, Autopsy, evidence handling	Forensic imaging lab
D9–10	Incident response lifecycle, capstone	IR report on simulated breach

1-Month Foundation

Week	Topics	Project
W1	SIEM deep dive, correlation rules, false positives	Custom SIEM dashboard
W2	Endpoint detection, Windows event logs	Endpoint investigation case
W3	Memory forensics intro, malware triage	Malware analysis report
W4	IR playbook, communication, capstone	Full incident response simulation

3-Month Job Ready

Month	Topics	Projects
M1	Advanced SIEM, threat hunting	Threat hunt report
M2	Digital forensics: chain of custody, court-ready reports	Forensic case file
M3	Purple team exercise, capstone	Blue team capstone + executive briefing

6-Month Professional

Add: cloud security monitoring, SOAR intro, 10+ simulated incidents, CompTIA CySA+ prep, portfolio of IR reports.

9-Month Advanced

Capstones: Enterprise SOC simulation (24-hr exercise) + forensic investigation of complex breach |
Level: L5

Assessment Rubric

Weekly Quiz 20% | Lab investigations 40% | Project 30% | Portfolio 10%

Appendix: Mentor Notes

Blue team focus — complements [Track 6](#) red team skills. All forensic evidence handling must follow chain-of-custody procedures.
