

Track 9: UI/UX & Web Design

June 2026

Track 9: UI/UX & Web Design

MR ROKESH TECHNOLOGY — Training & Internship Programs

Skill path: Design Thinking → Figma → Research → Wireframes → Prototypes → Handoff

Related: [Master Syllabus](#) | [Duration Framework](#) | [Track 1 — Full Stack](#) (implementation)

Track Overview

Who this is for: Aspiring UI/UX designers, product designers, and front-end developers with design focus.

Prerequisites: None; creativity and attention to detail emphasized.

Tools & lab environment: Figma (free tier), FigJam, Maze/UsabilityHub (testing), Notion/Google Docs (research), HTML/CSS/Tailwind (3-month+ implementation labs).

Certification targets: Portfolio-based; Google UX Design Certificate alignment (optional)

Outcomes by Duration

Duration	Hours	Job Readiness	Key Deliverables
2 Weeks	40–50	Design awareness	Complete Figma prototype
1 Month	80–100	Junior designer basics	Portfolio case study #1
3 Months	250–300	Internship-ready	UX case study + HTML/CSS build
6 Months	500–600	Job-ready portfolio	Real client project
9 Months	750–900	Senior designer track	SaaS design + enterprise design system

Weekly Rhythm (All Durations)

Mon–Thu design labs | Fri deliverable submission | Sat critique session | Sun case study documentation

2-Week Crash Course

Mini Project: Complete Figma prototype | **Level:** L1

Days	Topics	Deliverable	Self-Check
D1–2	UX vs UI, design principles, color/typography	Mood board	Explain visual hierarchy
D3–4	Figma basics: frames, components, auto-layout	Mobile app UI screens (3)	Component vs instance
D5–6	Wireframing, user flows, low-fi prototypes	App wireframe set	User flow vs user journey
D7–8	High-fidelity design, responsive layouts	Landing page design	8pt grid system
D9–10	Usability testing basics, developer handoff	Complete Figma prototype	Export assets for dev

Submission checklist: - ☐ Figma file with organized pages and components - ☐ Interactive prototype with 3+ linked flows - ☐ Design handoff notes (spacing, colors, fonts)

1-Month Foundation

Capstone: Portfolio case study #1 | **Level:** L2

Week	Topics	Project
W1	Design fundamentals + Figma mastery	UI kit creation
W2	User research, personas, journey maps	Research report
W3	Wireframing, prototyping, interaction design	App prototype (mid-fi)
W4	High-fi design, design system, case study	Portfolio case study #1

W4 acceptance criteria: - [] Problem statement, research summary, solution, outcomes - [] Before/after or iteration screenshots - [] Behance/Dribbble-ready presentation (5+ slides)

3-Month Job Ready

Capstone: End-to-end UX case study with live HTML/CSS build | **Level:** L3

Month	Topics	Projects
M1	Visual design, Figma, responsive web design	Landing page + mobile UI
M2	UX research, IA, wireframes, usability testing	2 app redesigns
M3	Design systems, accessibility, Tailwind implementation, capstone	End-to-end UX case study + HTML/CSS build

M3 Capstone acceptance criteria: - ☐ 5+ user research participants (or heuristic evaluation) - ☐ WCAG AA contrast compliance documented - ☐ Responsive HTML/CSS implementation matches Figma - ☐ Usability test findings incorporated in final design

6-Month Professional

Designlab + Experience Haus aligned

Month	Topics	Client Project
M1	Design thinking, Figma, visual design theory	Project 1: Local business redesign
M2	UX research, personas, journey maps, wireframes	Project 2: App UX research
M3	Prototyping, usability testing, iteration	Project 2 prototype
M4	Design systems, components, advanced Figma	Design system build
M5	HTML/CSS/Tailwind, WordPress, SEO basics	Implement designs in code
M6	Portfolio (4 case studies), career prep	Capstone: Real client project

M6 Capstone acceptance criteria (L4): - ☐ Signed client brief or mentor-approved simulated client - ☐ Full design process documented (discover → define → design → deliver) - ☐ Live website or app prototype delivered to client - ☐ Client testimonial or mentor evaluation form

9-Month Advanced

Capstones: SaaS product design + Enterprise design system | **Level:** L5

Additional modules: Motion design, micro-interactions, AI-assisted design workflows, Storybook handoff, A/B testing, analytics integration.

Assessment Rubric (Track-Specific)

Component	Weight	Criteria
Weekly Quiz	20%	Design principles, UX methods, accessibility
Lab Completion	40%	Figma files complete; iterations shown
Project	30%	Case study quality, usability, visual polish
Portfolio	10%	Behance/Dribbble/portfolio site with 3+ cases

Recommended Resources

- [Designlab UX Academy](#)
- [Figma Learn](#)
- [Laws of UX](#)
- [WCAG Guidelines](#)

Appendix: Mentor Notes

Common pitfalls: Skipping research; inconsistent spacing; poor contrast ratios; designs that ignore developer constraints.

Hardware: Any laptop; drawing tablet optional; second monitor recommended for Figma.

Cross-track: [Track 1 — Full Stack](#) for implementation; [Track 11 — Digital Marketing](#) for landing page conversion.
